JW Library Tutorial Curriculum

NOTE: *Official instructions on using JW Library can be found at JW.ORG (https://www.jw.org/en/online-help/jw-library/)*

About the JW Library Tutorial

This curriculum is intended for anyone instructing or guiding students using the accompanying *JW Library Tutorial*. The course is organized into three focused 15-minute lessons: **Finding Scriptures & Meetings**, **Downloading and Using Media**, and **Personal Study Tools**. A dedicated 10-minute wrap-up buffer provides generous flex time so instructors never feel rushed. Before the class begins, students should be provided with a copy of the tutorial materials and be reminded to have the app pre-installed on their device.

The *JW Library Class Program* serves as a template when planning a session schedule. Five minutes are designated at the beginning to orient students to their device layout. Each 15-minute lesson centers on three core hands-on actions, reserving complex topics for quick instructor demonstrations. The full session runs in 60 minutes, with the option to extend to 75 to 90 minutes for groups desiring additional individual assistance.

Audience

This tutorial is crafted for individuals with basic smartphone, tablet, or desktop computer familiarity. Students should be comfortable using a touchscreen or mouse. Prior experience with the JW Library app is helpful but not required.

Learning Outcomes

Upon completing this tutorial, students will be able to:

- Navigate between Bible, Publications, Meetings, and Personal Study.
- Access the Daily Text and enlarge reading text using the A A button.
- Locate weekly meeting study articles with one tap from the Meetings tab.
- Understand offline reading and download publications on Wi-Fi to preserve mobile data.
- Use the audio player (headphones icon) to listen to articles read aloud.
- Highlight answers in study articles in various colors and remove highlights.
- Create a safety backup (.jwlibrary file) to safeguard study records.

Prerequisites & Setup Tips

Before attending this course, students should have:

- A supported device running **Android 8.0+**, **iOS 15.0+**, **macOS M1+**, or **Windows 10 v2004+**.
- Arrive with a **fully charged battery** (or bring a charger).
- Temporarily set device **screen timeout to 2 or 5 minutes** to prevent the screen turning off.
- At least **2 to 4 GB** of available storage (or an installed SD card) for media files.
- Connect to a Wi-Fi connection prior to downloading video or audio media.

JW Library Tutorial Curriculum

Lesson 1: Finding Scriptures & Meetings (15 Minutes)

This lesson introduces students to moving smoothly between the primary sections of the JW Library app. Instructors should explain the placement of the navigation bar based on the devices present (bottom bar on iOS and modern Android; top menu on Windows). Demonstrate how tapping the **A A** icon enlarges text for comfortable reading, and how the **Meetings tab** provides one-tap access to weekly meeting publications.

Topics (10 minutes)

- Main Navigation Tabs (Bible, Publications, Meetings, Personal Study)
- Daily Text & Adjusting Text Size (A A button to increase font size)
- Opening a specific Bible book and chapter (e.g., Matthew 5)
- Meetings Tab (accessing Midweek workbook and Weekend Watchtower study article)
- *Instructor Demonstration:* Bookmarks, History, and Search (for practice at home)

Hands-On Core Exercises (5 minutes)

- **Core 1.1:** Open Daily Text and tap **A A** to make the print large and clear.
- **Core 1.2:** Tap Bible, choose a book (Matthew), and open chapter 5.
- **Core 1.3:** Open the Meetings tab and tap this week's Watchtower Study article.

Facilitator Notes for Lesson 1

Have table assistants verify that students successfully enlarge their text. Finding the A A button early builds confidence and makes the rest of the class enjoyable. Keep bookmarks and search as quick demonstrations so students do not get bogged down typing on touchscreen keyboards.

After completing this lesson, students will be able to:

- Switch comfortably between all main app sections.
- Enlarge text size across the app for strain-free reading.
- Open any Bible chapter and reach weekly meeting articles with one tap.

Lesson 2: Downloading and Using Media (15 Minutes)

This lesson explains how offline reading works and demonstrates downloading publications and multimedia. Emphasize that once an item is downloaded on Wi-Fi, it stays on the device permanently without requiring internet or mobile data at meetings. Introduce the audio player (headphones icon) so students can listen to text read aloud.

Topics (10 minutes)

- Understanding Offline Use: reading and listening with no cellular connection
- Connecting to Wi-Fi before downloading to preserve mobile cellular data limits
- Downloading publications and media (recognizing the Cloud icon)
- Using the Audio Player (headphones/play button) for narrated reading
- *Instructor Demonstration:* Sorting by Largest Size to inspect storage and delete files

Hands-On Core Exercises (5 minutes)

- **Core 2.1:** Confirm the device is connected to Wi-Fi at the top of the screen.
- **Core 2.2:** Tap the Cloud icon on a study publication or video to download it.
- **Core 2.3:** Open the Daily Text or a Bible chapter and tap the Headphones button to listen.

Facilitator Notes for Lesson 2

Reassure students on limited data plans that they will not use cellular data at meetings if they download ahead of time on Wi-Fi. Demonstrate the audio player clearly; many students with vision fatigue appreciate listening along while preparing their study.

After completing this lesson, students will be able to:

- Download publications safely on Wi-Fi without using mobile data.
- Open and read downloaded publications offline at congregation meetings.
- Play and pause audio readings of scriptures and articles.

Lesson 3: Personal Study Tools (15 Minutes)

This lesson covers highlighting study articles for meetings and safeguarding personal study records. Demonstrate how to select and highlight text in yellow, change highlight colors, and delete highlights. Conclude with the vital step of creating a .jwlibrary safety backup file in Settings so personal study markings are never lost.

Topics (10 minutes)

- Selecting text by gentle pressing and dragging to highlight
- Choosing highlight colors (Yellow, Blue, Green)
- Tapping highlighted text to switch colors or erase with the trash icon
- **Data Protection:** Creating a backup file (Settings > Backup and Restore)
- *Instructor Demonstration:* Adding notes, Tags, and viewing the Personal Study tab

Hands-On Core Exercises (5 minutes)

- **Core 3.1:** Open the next Watchtower article and highlight an answer in paragraph 1 in yellow.
- **Core 3.2:** Tap the highlighted answer to switch to blue, or tap the trash icon to erase.
- **Core 3.3:** Open Settings > Backup and Restore and tap **Create Backup**.

Wrap-Up & Facilitator Recommendations (0:50 - 1:00)

• **10-Minute Flex Buffer:** Use this 10-minute wrap-up buffer to review accomplishments, answer questions, or absorb extra time if earlier exercises ran long.
• **Table Assistants (Helpers):** Having 1 or 2 assistants quietly walking the room to help individuals with finger gestures prevents class delays.
• **Stay-After Clinic:** Offer to stay for 15 minutes after class for anyone wanting one-on-one help with their backup file.
• **Physical Handouts:** Distribute printed copies of the 1-page Class Program so students have step numbers on the table.

After completing this lesson, students will be able to:

- Highlight answers for meetings and adjust or erase highlights with confidence.
- Safely back up their study notes and markings to a .jwlibrary file.
